Alpha Trains receives certification for environmental management and occupational health & safety

TÜV Rheinland has certified the Alpha Trains Group according to ISO 14001 and ISO 45001 thus officially confirming that the lessor adheres to the highest standards in environmental and occupational health and safety management.

Alpha Trains, the leading rolling stock lessor in Continental Europe, passed the certification without any findings or deviations from the standard. The external auditors examined the processes and underlying documentation at our Cologne, Antwerp and Luxembourg sites. The auditors were particularly satisfied with the structure of the integrated management system and its very good practical orientation.

With this certification Alpha Trains re-emphasises the importance of environmental and occupational health and safety issues for the company. The lessor is continuously working to improve and increase its sustainability and safety standards - for the benefit of both its customers and the environment. The verification and confirmation of our measures by independent bodies is an important element in this sustainability process and creates a uniform and transparent system, especially with the growing number of employees and suppliers.

"Sustainable management and the safety of our employees are the key to our success. By developing binding guidelines and through continuous improvement, we reduce the number of occupational accidents and protect our environment. This strengthens the confidence of employees, customers, suppliers and shareholders", says Shaun Mills, CEO of Alpha Trains Group.
